Summary

Frontend Developer with over **3.5 years** of commercial experience in **enterprise products: insurance, outsourcing, billing, CRM** and internal **SaaS platforms**. Core stack: **Vue/Nuxt, TypeScript, Composition API, Pinia**; production experience with React and mobile development with **Capacitor/Ionic**. I develop and maintain frontend architecture (FSD, modular UI kits, reusable components) and own tasks end-to-end: from aligning API contracts with the backend to release through GitLab CI/CD. Shipped a mobile application with digital signature to production. Implemented **P2P** video calling on native **WebRTC** to improve request handling processes.

Technical Skills

Skills: JavaScript, TypeScript, Vue 3, Nuxt 3, React, Next, Ionic, Capacitor, HTML, CSS, SCSS, Tailwind, REST API, Axios, Vite, Webpack, Docker, CI/CD, GitLab, Git, Jest, Vitest, Playwright, WebRTC

Additional: Pinia, Zustand, Web Socket, i18n, shadcn, Ant Design, Material UI, Vant, Jira, Postman, Swagger, Slack, AI tools

Languages: English (B1), Kazakh, Russian

Experience

Middle Frontend Developer | [Amanat Insurance JSC](#)

Almaty, October 2025 — Present

- Developed the [Agent Digital Platform](#) mobile application (**Nuxt + Capacitor, iOS/Android**): agent onboarding and document signing moved **100%** to digital, agent activation time reduced from several days to one business day; integrated digital signature via **eGov / Digital ID**.
- Implemented **P2P video and audio calling, screen sharing and chat over WebSocket** for the HelpDesk module on native **WebRTC**: incident handling time was reduced **roughly by half**.
- Automated quoting processes — **90%** of operators' manual work replaced by the platform.
- Rewrote legacy code from **JS** to **TS**; performed code reviews and took part in planning and architecture discussions for the internal SaaS platform **ADP (Amanat Digital Platform)**.

Middle Frontend Developer | [Wisk Telecom Solutions](#)

Almaty, February 2025 — September 2025 (8 months)

- Developed the [Smart SU](#) platform with the team (monitoring, billing, city infrastructure management) on **Vue + Composition API + FSD**; ensured a scalable project architecture.
- Built reusable UI components with the team (tables with virtualization, filters, complex multi-step forms): typical sections became **1.5–2 times** faster to assemble, **code duplication decreased**.
- Integrated REST API, including JWT-based authentication and session management.
- Took part in the full development cycle: from sprint planning in Jira to code review and production deployment via CI/CD on GitLab.

Frontend Developer | [Nomad Standard Consulting](#)

Almaty, June 2023 — February 2025 (1 year 9 months)

- Developed and maintained **10+** web applications (CRM, learning portals, corporate websites) on **Vue** and **React** for companies: **KIA, Chevrolet, Allur, Doscar, HALYK Kazteleport, KazAtomProm, Mentorme and others**.
- Developed **reusable components** within the team - which **cut project development time by roughly a quarter**; migrated projects to **TypeScript**: reduced the number of runtime errors
- Worked directly with **enterprise clients**: clarified requirements, ran demos, supported releases and maintenance after launch.

Junior Frontend Developer | [IMarketing](#)

Almaty, February 2023 — May 2023 (4 months)

- Built websites, landing pages and online stores on **Vue 2/3**; integrated third-party APIs, wrote reusable components, implemented responsive design.

Education

[SDU University](#) — Almaty, Kazakhstan | Bachelor's Degree in Information Systems | 2020 — 2024
